

10.402 Final project assessment and documentation

It's time to submit your final project. Make sure to check that you have everything detailed below:

Required elements:

- Your application must be programmed in React Native, using Expo.
- You should demonstrate careful planning and wireframing during concept ideation, building on the skills you have developed in the first 5 topics.
- Your application should be a good demonstration of your skills as it forms a significant part of your mark. It can be a simple concept, but make sure that programmatically it shows off everything that you have learnt.
- Your application should be in a state that is representative of an app ready for submission to an app store.

What you will submit in Topic 10

In Topic 10 you will need to provide the following:

You submit:	Details:
Final project source code	Provided as a zip with the node_modules and package-lock.json files removed
Expo link	A link to your project uploaded to expo, as you completed for your small projects at the CW1 deadline.
readme.md	A readme file that details any instructions to aid us in running your application
project-report.pdf	A PDF of your final report
Youtube link	(optional) a link to a youtube video of you demonstrating your application. This can be useful if there are features of your application that are better visually demonstrated.

Submission details

Final project programming

Your final project programming should best represent the skill you have developed in Topics 1-10 of this module. I recommend that you use all the techniques learnt including wireframing, user flow diagrams, prototyping, iterative testing and unit testing. The key is to show your confidence with React Native. You can do this. Keep your code clear, neat and formatted.

Project report

Your project report should document the development process of your application and the key moments of development. So for example, you could have the following headings

- Concept development
- Wireframing
- User feedback
- Prototyping
- Development
- Unit testing
- Evaluation

However, I suggest you choose a format that is best for you.

Your report should be a minimum of 1,000 words and formatted at 12pt type.
